Effective recovery improves and enhances the overall wellbeing. It supports lasting regeneration, one of the key pillars in fitness, wellness, and modern medicine. And the core focus of **well**system's product range.

wellsystem stands for scientifically proven technologies, premium craftsmanship, and intuitive usability – the perfect complement to any self-service offering.

Our innovative wellness solutions harness the natural elements of water, heat, and light. We provide smart welltech systems that boost wellbeing, stimulate deep regeneration, and seamlessly integrate into any concept.

Experience the world of **well**system.

WHAT OUR CLIENTS SAY

„Our members want more than just a workout. We use the **well**system Hydrojet because it offers a deep-acting and soothing massage that can be used at any time via self-service."

Michelle Stettinski, Managing Director, Sportfabrik Bonn

„**well**system is an alternative wellness treatment for our guests, offering a unique, hands-free experience, making it a perfect complement to our traditional hands-on therapies."

AN UNMATCHED HYDROWAVE EXPERIENCE

THE UNIQUE MASSAGE EXPERIENCE

Stress, poor posture and lack of exercise are increasingly leading to tension and discomfort in the neck, shoulders, and back.

The **well**system dry water massage combines the power of water and soothing heat to deliver a deeply relaxing full-body or targeted massage.

Warm water jets move in gentle, rhythmic patterns beneath the soft lying surface, massaging the body from head to toe – while you float almost weightlessly on the dry water surface.

WELLSYSTEM HYDROWAVE PRO

wellsystem HydroWave Pro is the premium hydrotherapy bed featuring a touch display, 3D shoulder massage, spa canopy, and a wide range of exclusive features that offer an unmatched multisensory wellness experience.

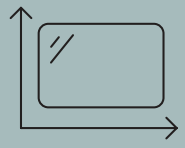

EFFECTIVE MASSAGE FOR STRONG SHOULDERS

The specially shaped mat ergonomically envelops the shoulder and neck area with its wave shape, allowing the massage jet to move around the entire shoulder muscles. This provides a comprehensive massage of the trapezius muscle. Innovative jets enable a particularly intense massage experience. For a highly effective shoulder massage that no other massage device can offer.

The **well**system HydroWave Pro offers massage programs developed by experts that can be individually adjusted to body size and shoulder width.

NFC INTERFACE

BEAUTY LIGHT
The ultra-intensive LED Beauty Light combines red light with near-infrared (photobiomodulation). It stimulates the natural production of collagen, tones the skin and visibly enhances the complexion when used regularly – for a fresh, youthful complexion.

INDIVIDUAL MUSIC CHOICES AND MEDITATIVE SOUNDS
The built-in sound system accompanies the treatment with relaxing music and meditative sounds. The user can even easily connect their own smartphone via Bluetooth® – so they can enjoy the music, podcast or guided meditation of their choice.

FRAGRANCES TAKE YOUR SENSES INTO A WORLD OF RELAXATION
Aromas have a direct impact on our mood and are able to stimulate or relax us, for example. Our carefully balanced blends of aromas promote relaxation and turn the massage into an all-round sensual experience.

THE SPA HOOD TRANSFORMS ANY MASSAGE INTO A MULTI-SENSORY WELLNESS EXPERIENCE

The HydroWave Pro's optional spahood transforms the dry massage treatment into a relaxing world of light, colours, aromas and meditative sounds for a pleasurable wellness experience. For moments of deep relaxation – with lasting effect.

Colors and light can improve your wellbeing and have countless positive effects on your mental and physical health. The colored light programs and the nurturing Beauty Light were developed together with a leading light biologist.

WELLSYSTEM HYDROWAVE PLUS

THE CLASSICS AMONG DRY WATER MASSAGE

Just like the top model, the HydroWave Plus also offer a choice of different massage areas such as full body, back, shoulders, lower back, legs, section massage, and spot massage. Massage programs and credit can be stored on chip cards. The **well**system HydroWave Plus is operated via a soft-touch keypad with a 7-segment display.

In addition to parallel massage, the HydroWave Plus offers additional massage techniques such as mirror image massage, circular massage, and parallel stroking massage, as well as three pre-installed massage programs. In addition, the massage speed and body length can be individually adjusted.
